

The Environmental Data Management Best Practices team prepared eight case studies. Although the primary focus of the case studies was on either Data Exchange or Traditional Ecological Knowledge, the information presented in these documents also illustrates information presented in work products by other subgroups.

Instructions: Click on the individual buttons within the graphical interactive directory to navigate to each work product shown in this interactive directory.

Case Studies

Data Exchange Focus

Historical Data Migration: Filling Minnesota's Superfund Groundwater Data Accessibility Gap

USGS: Challenges with Secondary Use of Multi-source Water Quality Monitoring Data

Traditional Ecological Knowledge Focus

Collection and Application of Local Knowledge to Local Environmental Management in Duluth, Minnesota

Improving Coastal Resilience in Point Hope, Alaska

Integration of TEK to the Remediation of Abandoned Uranium Sites

Local Ecological Knowledge of Historic Anthrax in a Natural Gas Field

Rest in Peace? A Cautionary Tale of Failure to Consult with an Indigenous Community

Use of TEK to Support Revegetation at a Former Uranium Mill Site

The acronyms, glossary terms, and references cited in these materials are also available on Environmental Data Management Best Practices website.
